

Together, we can make a difference

Because parking should never stand in the way of love, care, and presence.

Our Story

The Parking Foundation was created in memory of **Stephen Louis Bilak**, who spent 66 days in the ICU. His family paid more than \$1,000 in parking fees — an unexpected burden no family should face. His experience inspired our mission to ensure that no family carries this weight alone.

Our Mission

Our mission is to ease the financial burden of hospital parking for families and caregivers by providing **complimentary parking support** during hospital stays and medical treatment — beginning with families of children battling cancer and expanding as funding allows.

Why It Matters

When a loved one is ill, families should be focused on care — not parking fees. Yet during hospital stays, these costs can quickly climb into the hundreds of dollars, adding pressure to families already navigating some of the hardest moments of their lives.

Together, we can make a difference

We rely on the generosity of our community to help ease the burden of hospital parking, allowing families to focus on what matters most. There are many ways to support this work:

- **Volunteer** your time and skills
- **Donate** to help cover passes — *scan the QR code below*
- **Partner** with us as a corporate partner to help expand our reach and impact

Get involved – together, we can ease the burden of hospital parking
